

ZONEWORKS®

Press Release

Easily Change the Interior Space of Virtually any Industrial or Commercial Facility With the Zoneworks® Highly Flexible & Adaptable SCL Series of Sliding Curtains

Zoneworks® introduces the SCL Series of sliding industrial curtain walls, a highly flexible and adaptable fabric wall containment system that makes it easy to change the interior space of virtually any industrial or commercial facility – while at the same time – eliminating the need for costly and time-consuming projects involving permanent walls, or rigid panelized systems.

Versatile Zoneworks' SCL flexible industrial barriers allow users to quickly and easily create new environmental zones and/or alter existing space to better meet the needs of the operation and/or building occupants. The flexible fabric curtain walls are ideal for virtually any application where permanent load-bearing walls are

not needed, or cost-prohibitive. Customized to match the unique requirements of each installation, SCL industrial curtain walls save energy, optimize the use of functional areas, provide dust containment or fume control, ensure privacy, and improve aesthetics.

The SCL curtain suspends easily from ceiling joists or roof decks. The industrial curtain walls are constructed of a durable Vinyl®, fire-retardant fabric that meets NFPA-701 standards. A weighted bottom firmly holds the curtain in position at floor level. The curtain wall system slides effortlessly via a galvanized track and hanger configuration that incorporates the use of two-wheel trolleys. The SCL custom curtain walls are also available as a stationary system.

Custom engineering ensures a proper fit around corners and obstructions. Zoneworks industry specialists also provide on-site design consultation and complete drawings, as well as turnkey project support, including installation coordination.

About Zoneworks

Zoneworks is a sister company to Frommelt Products Corporation, an industry leader in the design and manufacture of environmental control solutions at the loading dock. Zoneworks specializes in flexible industrial barriers for a wide variety of large space separation, and zoning and containment needs in industrial and commercial facilities. Zoneworks curtain walls are available for temperature separation, heat containment, industrial humidity control, odor and fume control, dust containment, industrial noise reduction and other environmental control needs.

All Zoneworks products are designed and manufactured in the United States and meet NFPA-701 flame resistance standards. For more information, please call 1-800-553-4834, or visit www.zoneworks.com.
