

ZONEWORKS®
A Rite-Hite Company

Insulated Door Blanket

Protect the integrity of temperature-controlled items from the unexpected.

The Zoneworks® Insulated Door Blanket provides a quick and affordable way to protect temperature-controlled items and finished products from the threat of spoilage or irreparable damage. A valuable solution when powered doors on coolers or freezers unexpectedly shut down for any reason, including the loss of electrical power to the facility or another maintenance-related issue. With a Door Blanket, cooler/freezer integrity is preserved until the door issue is resolved.

Zoneworks Insulated Door Blankets offer you these unique benefits:

- Custom-designed to fit each individual door opening
- Fast and easy installation
- Easy integration into emergency contingency plans for power outages, storm damage and fork lift damage
- Cover comes in convenient, portable bag for simple storage and deployment

Easily protect your products when the unexpected happens.

DB

Constructed of durable industrial fabric surrounding layers of recyclable, antimicrobial polyester batting, the Zoneworks® Door Blanket eliminates the exchange of air at the door opening, protecting products and preventing costly energy loss.

Easy installation

Zoneworks Door Blankets easily secure using grommeted edges, Velcro® or magnetic hems, or industrial cables. Mounting methods can be customized to fit specific openings.

Fire retardant materials

Polyester batting is FMVSS-302 certified. Fire retardant vinyl fabric meets NFPA-701 and CFM flame resistant standards.

Barriers without barriers

At Zoneworks, we're experts in the design and construction of industrial curtain wall systems for all your environmental zoning needs. Our products meet the highest quality standards, and turn-key project support is provided for every job. Zoneworks is part of the Rite-Hite family of companies, all focused on leading-edge technology and innovative alternatives for industry's toughest safety, security and energy-savings challenges. All Zoneworks products are manufactured proudly in the USA.
