

ZONEWORKS®

Press Release

Zoneworks® Sliding Softwalls are flexible partitions that provide temporary, cost-effective space separation to gain better environmental control and/or meet the need for separate zones

Zoneworks® Sliding Softwalls (or “curtain walls”) are flexible industrial barriers that allow users to easily adapt large interior spaces to gain better environmental control – and/or create separate zones in order to create privacy, improve cleanliness, increase security, contain odors, provide fume control, dust suppression or industrial noise reduction, and accomplish other key facility management goals.

Zoneworks Sliding Softwalls slide open or closed with minimal effort. The result is a convenient and cost-effective way to make the existing space better fit the facility’s immediate- and long-term needs and enhance the environment of the people who use it. Made out of heavy-duty industrial vinyl, the flexible partitions are custom-designed for each application, allowing users to improve physical space without the cost, permanence or space requirements of rigid walls. Curtain wall systems can be reconfigured as facility layout or environmental control needs change.

A heavy-duty track and trolley system supports the sliding soft curtain walls, which can be easily mounted to existing ceiling structure. Other key design features include a flexible bottom sweep to minimize energy loss and help maintain desired conditions, and galvanized drop pins and floor sockets for stability in high winds if needed. Zoneworks’ industry specialists provide on-site design consultation and complete drawings, as well as turnkey project support, including installation coordination.

About Zoneworks

Part of the Rite-Hite family of companies, Zoneworks is an industry leader in custom-designed fabric wall systems and other environmental zoning products for all types of space separation and environmental containment needs in industrial facilities. Curtain wall systems can be designed for temperature separation, heat containment, industrial humidity control, sound attenuation, dust containment, odor or fume control, loading dock enclosure and temporary storage.

All Zoneworks products are designed and manufactured in the United States and meet NFPA-701 flame resistance standards. For more information, please call 1-800-553-4834, or visit www.zoneworks.com.
