A Rite-Hite Company

SZ Acoustic Curtain Walls

Reduce excessive noise levels in industrial, commercial and institutional spaces.

Knock down sound with Zoneworks™ noise-control solutions.

With modular Zoneworks™ Insulated Curtain Walls, you can:

- Apply an affordable alternative to permanent wall construction
- Enclose or isolate noisy equipment or operations
- Partition areas for sound-control in multi-use facilities
- Protect employee comfort and productivity
- Custom-design a noise-control solution for your specific application
- Reconfigure as needed when operations change

Zoneworks insulated SZ panels are layered with sound-absorbing materials and can reduce noise levels by 22-25 dBs, depending on existing frequency levels. Systems can be configured to match any need, from single-machine isolation to full-room division, with full-panel sliding or stationary mounting. Modular panels connect securely with Velcro® for custom application and easy reconfiguration. Expert, turn-key support is provided for all stages of a project, from design through installation.
