Press Release

Gain control over interior noise with SZ Acoustic Curtain Walls from Zoneworks

Reducing excessive noise within virtually any industrial, commercial and institutional facility is now easy and affordable with sound-absorbing SZ Acoustic Curtain Walls from Zoneworks.

Zoneworks SZ Acoustic Curtain Walls can assist in industrial noise reduction inside buildings by up to 22-25 decibels, making a space approximately four times quieter than it would be without them depending on existing noise frequency levels. Unlike other noise control products, the modular and highly flexible curtain walls can be designed to custom-fit nearly any existing space – without having to invest in costly permanent walls that would otherwise be needed to address bothersome and potentially harmful noise levels.

SZ Acoustic Curtain Walls feature panels layered with sound-absorbing materials. The sound-dampening, modular panels connect securely with Velcro® and can be easily reconfigured. These noise reduction walls are ideal for use in factories, machine shops, industrial operations, classrooms, meeting rooms, call centers or anywhere industrial noise control is required. SZ Acoustic Curtain Walls are often used to:

- Enclose or isolate noisy equipment, or loud operations
- Partition areas in multi-use facilities for better sound control
- Protect employee comfort, which in turn, boosts productivity
- Create quiet work areas for facility occupants

SZ Acoustic Curtain Walls can be designed as stationary walls, and/or units that easily slide open and closed. The walls are available in a wide selection of fabric colors. Zoneworks' industry specialists provide on-site design consultation and complete drawings, as well as turnkey project support, including installation coordination.

About Zoneworks

Zoneworks is an industry leader in custom-designed fabric wall systems and other environmental zoning products for all types of space separation and environmental containment needs in industrial facilities. Systems can be designed for temperature separation, heat containment, industrial noise reduction, dust containment, odor or fume control, loading dock enclosure and temporary storage.

All Zoneworks products are designed and manufactured in the United States and meet NFPA-701 flame resistance standards. For more information, please call 1-800-553-4834, or visit www.zoneworks.com.
